REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art discloses a method of controlling an induction generator measuring a plurality of current amounts by using sensors, measuring a DC voltage supplied to an inverter and the inverter being connected to the generator and measuring a plurality of voltages by using sensors and calculating a flux by using the current and voltages obtained. However, the prior art fails to show, in combination with the invention that the a calculated flux is compared with a desire flux to determine a flux error and such flux error is inputted to a flux regulator so that a d-axis voltage is determined so as to reduce the flux error amount. Moreover, a desired torque amount is determined to reduce the voltage error amount and determining a q-axis voltage so as to reduce a torque error amount and transforming the d-axis voltage and the q-axis voltage to a stationary reference frame.

With respect to the double patenting rejection, the Applicant filed a Terminal Disclaimer on 02/20/03, which overcomes the double patenting rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
